

CANNING VOLUNTEER FIRE DEPARTMENT

Standard Operating Guideline

Self Contained Breathing Apparatus Maintenance

- A) All self contained breathing apparatus must be cleaned, inspected, and returned for immediate use as soon as possible after each emergency operation or training exercise.

- B) Every member who uses a self contained breathing apparatus is responsible for changing the air bottle, cleaning the mask and operating equipment, and returning the self contained breathing apparatus to its proper location ready for immediate use.

- C) The Officer of the apparatus will inspect all self contained breathing apparatus. To insure the scba's are cleaned and returned correctly.
